the materials matter

We offer pens made
with RPET.

We offer pens made
from renewable
softwood materials.

We offer pens made
of post-consumer
recycled paper.

We use high-grade plastics
in our pens. ABS plastic is
designed to provide clarity,
strength, flexibility and a
smooth shiny surface, and it
can stand up to high
temperatures.
PP, another flexible and
durable material, is
also nontoxic.

Comfortable pen
grips are made using
TPE (matte finish) or
TPR (glossy finish).
Both are flexible and
lightweight and can be
made in a wide variety
of colors.

Most of our pens have
durable tungsten carbide
ballpoints. This substance
is as hard as diamond.
The ball is perfectly
spherical, allowing
for smooth writing.

Show off your brand's innovative style with the ultramodern look of the metallic **Souvenir® Daven Pen** (56035).
